

ROSÉ WINE

HISTORY AND FACTS

Our first bottle of rosé wine was born in 2013; it is a wine with a strong personality and exquisite aromas. The way of production, as well as the variety or varieties used are kept as a secret, so to give you the possibility to have a completely free tasting. This rosé is perfect for those who are never satisfied and want to be inventive.

THE LABEL

The label is white, it's freedom. It is a white "canvas" on which you can free your creativity and be yourself by designing the wine label. No restriction, no boundaries, no prearranged label. It is just like our rosé wine, which was born from creativity and impulse and established by instinct. It is a real artistic attack, characterized by intense aromas and surprising freshness. Each customer will be the artist, helped by the aromas of the wine, the rhythm of the poem and by the flow of thoughts. The only rule is that there are no rules.

TASTING NOTES

It has an intense pink color with pale orange hues and strong red fruits, harmoniously blended with honey hints. It is rich in aromatic notes and characterized by slight spicy scents, recalling the white pepper. On the palate it is fresh and sweetish, persistent and pleasantly soft, characterized by smooth tannins. The finish is complex; breathing you can feel the harmonious encounter of fruit and spices.

SERVING SUGGESTIONS

Serve between 10-12°C in middle-size glasses. Ideal as an aperitif, it pairs well with delicate or slightly smoked salami, stuffed or au gratin pasta. It is ideal also to accompany poultry and aromatic white meat, truffle and fresh, delicate cheese.
